

Potential Agenda Topics

Overview of Draft TMDL

Issues

Implementation

Achievability and Potential Need for UAA Process

Specific Opportunities for Improvement

– e.g., Grand Coulee, Hells Canyon, Dworshak

TMDL

Natural Condition (No Dams) Baseline

TMDL Study Area – Upstream Boundaries and Boundary Conditions

Modeling – Model used (RBM10), Other models, Data, Complexity, etc.

Alternatives (discuss pros and cons)

Parallel TMDL and UAA Processes

Break into multiple TMDLs

Use a different water quality model or multiple models

Simplify the TMDL – e.g., group the dam allocations
